

# Property Council / IPD New Zealand Property Index

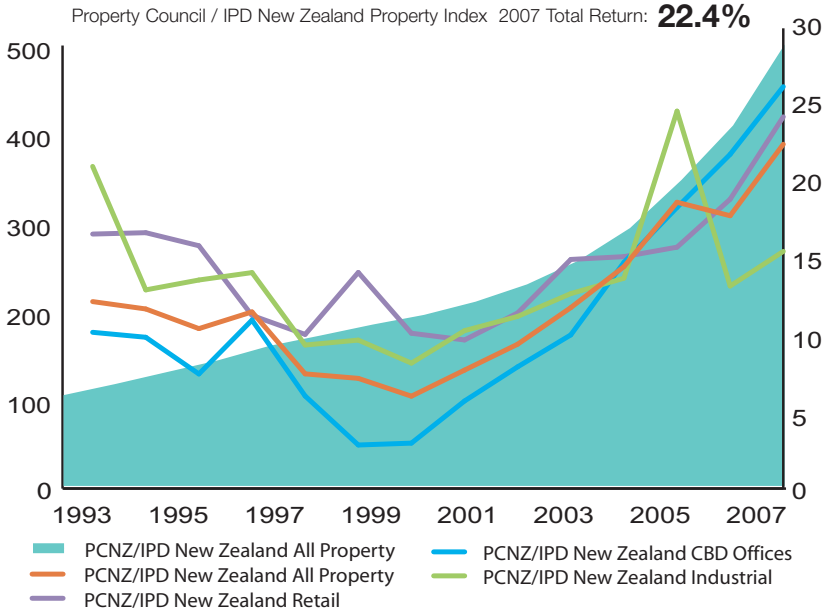

Results for the year to 31st December 2007

On the pulse of the property world

The Property Council / IPD New Zealand Property Index, soon to be one of the component country indices of the IPD Global Property Index, measures the returns to directly held standing property investments from one open market valuation to the next. Additional indices are calculated covering the major sectors of the New Zealand property market.

## Property Council / IPD New Zealand Property Index Performance

## IPD

IPD is the world leader in performance measurement and analysis for the global owners, investors, managers and occupiers of real estate, through the provision of independent market indices and individual portfolio measurement and analysis services. Operating on five continents, IPD provides its index and benchmark services in over twenty of the world's leading real estate investment markets. An independent company, IPD does not participate in investment markets and does not offer consultancy advice on investment decisions or other real estate issues.

### IPD Index Methodology

IPD calculates its indices using the valuation and management records for individual buildings in complete portfolios, collected direct from investors. Only those buildings held as property investments within regularly valued portfolios are eligible. All valuations used in the indices are conducted by qualified valuers. The indices show the return on capital employed in market standing investments, i.e. properties held from one valuation to the next, excluding any properties bought, sold, under development or subject to major refurbishment in the course of the measurement period. Further information regarding the index calculation methodology is available in the IPD Index Guide, available from IPD or online at [www.ipd.com/indices](http://www.ipd.com/indices)
